AI for Mental Health Screening and Support

"You don't have to figure it out alone."

THE PROBLEM

Many young people live with stress and anxiety in silence. Stigma, cost and a shortage of mental health professionals mean help comes late, or not at all.

SDG 3 ALIGNMENT

Supports **Target 3.4** (promote mental health and well-being) by widening access to early support and encouraging people to seek care sooner.

CORE FEATURES

- Conversational check-ins in English, Hindi and Odia
- Validated screening (PHQ-9, GAD-7) with kind, clear explanations
- Self-care toolkit: breathing, grounding, journaling, sleep tips
- Referral to counsellors and helplines, with a crisis safety protocol
- Privacy-first: consent, anonymised data, delete anytime

OUR SOLUTION

A friendly, private chatbot that helps people check in on their feelings, screens with trusted questionnaires, suggests simple coping tools, and guides them to real professionals when needed. **It never replaces a counsellor or doctor.**

BENEFICIARIES

Students and young adults, especially in smaller cities and rural areas, plus counsellors who gain a clearer picture of community needs.

EXPECTED IMPACT

- Earlier help-seeking
- Less stigma around the first conversation
- More people connected to professional care
- Better insight for campus wellness teams
