

1 PROBLEM • Young people stay silent about stress and anxiety because of stigma. • Counsellors are scarce and costly, especially outside metros. • People are unsure when what they feel is "serious enough" to seek help. Existing alternatives Ignoring it, talking to friends, generic wellness apps, long waits for appointments.	4 SOLUTION • Multilingual chatbot (English, Hindi, Odia) on WhatsApp and web. • Validated screening (PHQ-9, GAD-7) scored by rules, not AI guesses. • Guided self-care: breathing, grounding, journaling. • Referral to counsellors and helplines; crisis protocol. 8 KEY METRICS • Active users and completed screenings • Repeat check-ins • Referral rate • User comfort and helpfulness ratings • Crisis hand-offs handled safely	3 UNIQUE VALUE PROPOSITION • A private, judgment-free first step: check in, understand how you feel, and get connected to real help, in your own language. • Supports professionals; never replaces them. High-level concept "A caring first-aid kit for the mind."	9 UNFAIR ADVANTAGE • Local-language, culturally grounded design. • Clinician-reviewed content and scripted crisis responses. • Trusted campus, counsellor and NGO partnerships that take time to build. 5 CHANNELS • WhatsApp and web • College wellness cells and NGO partners • Student ambassadors • Social media awareness campaigns	2 CUSTOMER SEGMENTS • Students and young adults (16-29) in colleges and Tier-2/3 cities. • Secondary: campus counsellors and NGOs (anonymised insights). Early adopters College wellness cells, student communities, and NGOs working on youth health.
7 COST STRUCTURE • Cloud hosting and AI usage • Clinician and counsellor advisory fees • Translation and localisation • Security and compliance • Outreach and awareness • Small core team		6 REVENUE STREAMS • Free for students, always. • Institutional licences for colleges and universities. • CSR and grant funding. • NGO and government health partnerships.
